EDUCATION

University of Colorado Boulder

Ph.D. Electrical, Computer & Energy Engineering

Boulder, CO

Aug 2024 - Present

University of Colorado Boulder

M.S. Electrical, Computer & Energy Engineering

Boulder, CO

Aug 2024 - May 2026

Santa Clara University

B.S. Engineering Physics, Summa Cum Laude

Santa Clara, CA

Sep 2017 - June 2021

Undergraduate Honors Thesis

A Web Application to Visualize Advanced Fuel Cycle Waste Characteristics

Santa Clara, CA

(https://rob-stallman.github.io/SCU_UHP_thesis/)

- Analyzed DOE nuclear waste characteristics from 40 advanced nuclear fuel cycle designs
- Enabled data visualization of key parameters for nuclear waste management on the million-year time-scale through development of a full-stack web application in Python

GRANTS & AWARDS

- Best Paper, American Nuclear Society Student Conference (NC State University, 2021)
- Outstanding Senior in Physics, Santa Clara University Physics Department (2021)
- Fox Summer Research Fellow, Santa Clara University Physics Department (2019)
- Johnson Scholar, Santa Clara University (2017-2021)

PRESENTATIONS & PUBLICATIONS

- *A Web Application to Visualize Advanced Fuel Cycle Waste Characteristics*, American Nuclear Society Student Conference (2021)
- *So Many Fuel Cycles, So Little Time*, Santa Clara University Physics Colloquium (2021)

RESEARCH EXPERIENCE

University of Colorado Boulder, Hodge Lab

Graduate Research Assistant

Boulder, CO

August 2024 - Present

- Developing modeling techniques to assess power system operational impacts of in-motion wireless charging of electric vehicles
- Collaborating within the NSF-funded ASPIRE Engineering Research Center, a nationwide academic–industry consortium

Stanford University, Irwin Lab

Undergraduate Research Assistant

Palo Alto, CA

June 2019 - Aug 2019

- Developed a measurement scheme and performed precision calibration of a diode-based thermometry system at 4 Kelvin
- Designed a printed circuit board (PCB) using Altium for high-precision, low-noise measurements in a superconducting sensor experiment

Rob Stallman

Boulder, CO | (541)-816-1896 | robstallman3@gmail.com | LinkedIn: [in/rob-stallman/](https://www.linkedin.com/in/rob-stallman/)

PROFESSIONAL EXPERIENCE

Zitara Technologies, Inc.

San Francisco, CA

Field Applications Engineer

November 2023 - July 2024

- Collaborate with customers to integrate battery management system (BMS) solutions with applications in renewable energy and transportation exceeding \$100M asset value
- Define and deliver new BMS features by identifying product gaps and advocating on behalf of customers to internal teams

Lunar Energy

Mountain View, CA

System Test Manager

Dec 2022 - October 2023

- Defined, executed, and documented system-level validation tests for the operation of a 20kWh, 10kW residential energy storage system with solar power integration
- Developed and managed firmware quality assurance (QA) testing and release pipeline to continuously deliver feature developments to internal teams and alpha deployments

System Test Engineer

Jan 2022 - Dec 2022

- Developed automated test scripts in Python to interface with test equipment and power electronics, enabling efficient product verification & validation testing
- Designed, utilized, and trained others in the use of in-house data analysis tools to improve visibility into system behavior and enable root-cause analysis

Antora Energy

Sunnyvale, CA

Intern

Jun 2021 - Oct 2021

- Improved accuracy of thermophotovoltaic (TPV) cell efficiency model by incorporating additional cell parameter data from a SQLAlchemy database
- Developed Python-based GUI for product efficiency models and provided training of the tool for internal stakeholders, resulting in 10x increase in engagement with the models

SKILLS

Computer: Python, Julia, MATLAB, Git

Lab: Instrumentation, experiment design, data collection automation

Relevant Coursework: Power Systems Analysis, Power System Dynamics with Renewable Energy, Renewable Energy and the Future Power Grid, Power System Planning & Operations, Distribution Systems Analysis, Control Systems Analysis
